## PROFILE

I am a hard-working and self-motivated recent graduate with a Bachelor's degree in informatics engineer from Al Baath University having a good knowledge in computer science. My goal is to obtain a position where I can prove my technical and communication skills.

## EDUCATION

**Al Baath University | Homs, Syria**

**2015–2021**

Bachelor's degree in informatics Department of Networking and Computer Systems

## SKILLS

Python – Laravel - Backend development - Endpoint design and implementation - API development - Technical troubleshooting - Project management – Self-motivation - Communication skills – Time Management – Work ethic - Team collaboration – Arabic (Native ) - English (Upper intermediate)

## Works

**Backend Developer:** Collaborated with clients to understand their requirements, provided technical solutions, and ensured timely delivery of projects

1. Delivery Service Optimization
  - Developed and implemented RESTful APIs to handle order placement, tracking, and status updates
2. Admin Dashboard for Delivery Management
  - Designed and developed an intuitive admin dashboard using Laravel framework
  - Implemented user authentication and authorization for different user roles
  - Integrated data visualization tools to generate comprehensive reports on delivery performance

**Graduation Project:** Network management with python

- We built our virtual network using **GNS3** with VMware to connect the devices in the topology with local network
- Established the connection and implement the new modifications on the specified devices by using python libraries like (Netmiko, Pramiko, Napalm, .....)
- Monitor the traffic and payload network using wireshark
